🏆 SUMMARY

Full Stack Software Engineer with 5+ years of experience building scalable web and mobile applications using React, Node.js, MongoDB, and Firebase. Proven experience delivering SaaS platforms, fintech systems, and real-time applications for clients in the UK, EU, US, and Australia. Strong focus on performance, clean architecture, and production-ready solutions.

👛 PROFESSIONAL EXPERIENCE

02/2020 – 07/2022
Multan, Pakistan

Technovez

Senior Software Engineer (Frontend – React)

- Built and maintained reusable React components for scalable SaaS products.
- Enhanced frontend performance by implementing lazy loading, memoisation, and API response optimisation, reducing rendering overhead and improving overall application speed.
- Collaborated with backend teams using REST and GraphQL APIs

08/2022 – 03/2025
Ballarat, Australia

Squadly

Full Stack Software Engineer (MERN)

- As a Full Stack Web Developer at **Squadly**, a SaaS-based company, Utilizing modern technologies such as technologies, e.g., React, Node.js, Mongo db, GraphQL, etc.

02/2025 – present

Onixs Ai

Full Stack Web & App Developer

- Developed and maintained scalable web and mobile applications used by 1000+ users
- Built backend services using Firebase, Supabase, and MongoDB with secure authentication and role-based access
- Implemented serverless Cloud Functions to improve performance and reduce infrastructure costs
- Led end-to-end development from architecture to deployment

🎓 EDUCATION

03/2017 – 09/2021

BSCS

GCUF

07/2014 – 02/2017

Intermediate

Rise College Multan

SKILLS

Languages

HTML, CSS, JavaScript (ES6+), TypeScript

Mobile

React Native, Expo

Databases

Mongo DB, Firebase

Payments & APIs

Stripe, PayPal, REST, GraphQL, Open AI

Frontend

React, Next.js, Redux, Tailwind, CSS, Styled-Components, Material UI, Chart Js

Backend

Node.js, Express, Firebase, Supabase

DevOps & Tools

Docker, Git, Cloud Functions

Real-time Communication

Socket.io  & Firestore Snapshot

CERTIFICATES

- Scrimba – Advanced React 
- Interaction Design Foundation – UX Usability Testing 
- Interaction Design Foundation – UX Designer 
- Interaction Design Foundation – UX Product Adoption 

PROJECTS WORKED ON

2024 – 2026

Castle Auction (Web & App & Admin)

Libya's first auction house

- Built a complete online auction system consisting of a web application, mobile app, and centralized admin dashboard.
- Designed and implemented the backend using **MongoDB** with secure APIs for auction management, user handling, and real-time updates.
- Integrated **Stripe** for payment processing and optimized the system for performance, scalability, and data security.

2022 – 2025

Squadly

Australia (Ballarat) - Present

- As a MERN Stack Developer at **app.squadly.io**, I designed and developed dynamic web applications using React.js, Node.js, Express, and MongoDB.
- Leveraged Tailwind CSS for responsive and modern UI components while integrating real-time features with **Socket.io** .
- Implemented data visualization using **Chart.js**, managed scheduling functionalities with **FullCalendar**, and incorporated location-based services using **Google Maps React**.

Payrex

The financial operating system

- In Payrex, I designed and developed intuitive admin and customer-level dashboards with key features like receipt generation, payment method management, and seamless integration with payment APIs such as Stripe and PayPal.

2024 – 2025

Health Platform

UK

- I contributed to this hub-and-spoke healthcare platform by implementing real-time video consultations.
- Google Maps integration for location services, **Socket.io**  for live notifications, and secure **payment gateway integration** to facilitate seamless transactions.

2025 – 2026

MOI (App & Web & Admin) [↗](#)

Muslims of Ireland

- Developed a full-stack platform including a responsive web application, React Native mobile app, and a web-based admin panel for the Muslim community in Ireland.
- Implemented backend services using **Firebase (Authentication, Firestore, Cloud Functions)** and integrated **Stripe** for secure online payments.
- Focused on scalable architecture, role-based admin access, and reliable cloud deployment.
